Join Our Research Lab in Software Testing and IoT Security at UAH Huntsville!

🔬 Research Lab Focus Areas

1. Software Testing Advancements: fuzzing, combinatorial testing, data flow analysis
2. IoT Security Innovations: security analysis methods for IoT wireless protocols

🎓 About Us

Join the cutting-edge research lab led by Assistant Professor *Dr. Mengfei Ren* in the Department of Electrical and Computer Engineering at the University of Alabama in Huntsville. Collaborate, innovate, and make a difference in the fields of Software Testing and IoT Security. We're endeavoring to apply advance software testing techniques, such as fuzzing, data flow analysis, symbolic execution, combinatorial testing, to discover security-related problems in the IoT device and wireless protocols.

🚀 Why Choose Our STIS Lab?

- Work with Expert Mentor ***Dr. Mengfei Ren*** specializing in software testing and IoT security.
- Collaborate Across Disciplines that combines software testing techniques with security analysis.
- Enhance Your Research Skills like critical thinking, writing, presentation, and communication.
- Contribute to Real-world Solutions.

🔍 Available Positions

1-2 full-funded Ph.D. positions are opening for Spring 2024 and Fall 2024. The admitted students will be covered with tuition fee, insurance, and stipend for living during the PhD study.

📝 Application Requirements

- Strong motivation and high ambition in research toward successful Ph.D. degree.
- Bachelor/master's degree in Computer Engineering or Computer Science with good GPA.
- Excellent analytical and programming skills in C and Python.
- Strong communication and teamwork abilities.
- English: IELTS >= 6.5, TOEFL iBT >= 80. GRE score is a plus, but not required.

Please find more information about PhD admission on this website.

💼 How to Apply

Interested students are welcome to apply by sending an email to menfei.ren@uah.edu including the following items:

- Email subject title: "***PhD Application_[your name]_[your applied semester]***"
- Motivation of pursuing Ph.D. degree and doing research in software testing/cybersecurity
- CV/resume with a list of publication if available
- Bachelor and Master (if available) transcript + English test score

The interview will be conducted shortly for good candidates, thus early applications will be given priority for consideration.
